## **Family Members**

The selected client's family members are displayed below. You may search for existing clients to add to this family or add new clients to the database and associate them

It's important to note that family members are the people who the client is related to. Family isn't always the same as a client's household. According to HUD "[a] household is a single individual or a group of persons who apply together to a continuum project for assistance and who live together in one dwelling unit (or, for persons who are not housed, who would live together in one dwelling unit if they were housed." (Data Manual)

This workflow will allow you to enroll all family members or select which family members you want to enroll.
